Experience

Intern - Lumen Technologies India (Feb 26 - Aug 26) (Stipend)

- Developed **4 production automation applications** (Python, Selenium, SOAP APIs, Power Automate) that automatically resolve **~400+ tickets, tasks, and records monthly**, eliminating repetitive manual effort.
- Automated **duplicate-ticket closure, stale-task force-closure, and bulk record processing (~150 records/month)** across enterprise ticketing and fulfillment workflows.
- Integrated **SOAP/WSSE authentication** services to automate case creation and updates across multiple workflow systems.

Projects

1) Infosys Internship
Speech-to-Image Live Conversion using Deep Learning

- Built an end-to-end pipeline recording audio, transcribing via **Whisper**, running sentiment analysis, and generating images with **Stable Diffusion** for positive/neutral inputs.
- **Tech:** Python, Streamlit, Whisper AI, Stable Diffusion, Google Colab.

2) Deepfake Detection Using Live Video Calls

- Collaborated on a real-time system that verifies interview participant authenticity by analyzing facial movement, head position, lip-sync, and expressions, then sends authenticity alerts.
- **Tech:** Python, OpenCV, MediaPipe, TensorFlow/PyTorch, Streamlit.
